Project Executable Files

Date	15 March 2026
Team ID	SB-EDU-2026-04
Project Name	EduGenie - AI-Powered Educational Assistant
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
EduGenie-root/
  app/                 - FastAPI application (main.py, routers)
  templates/           - Jinja2 HTML templates (query, quiz, summary, learning path)
  static/
    css/               - Stylesheets
    js/                - Client-side scripts
  models/              - LaMini-Flan-T5 loading & inference logic
  utils/               - Prompt engineering & response formatting helpers
  tests/               - Unit and integration tests
  requirements.txt     - Python dependencies
  .env.example         - Environment variable template (GEMINI_API_KEY)
  README.md            - Setup and run instructions
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not publicly hosted - runs locally (demo via video)
Login Credentials (Demo)	No login required to use the app
Platform / Hosting Provider	Local (Uvicorn on Mac M1); not deployed to cloud
Repository Link	`https://github.com/AP24110010223/EduGenie`
Demo Video Link	`https://drive.google.com/file/d/1V95TpynEXIZ6qy50L5Xpny5gD_g5_Cg4/view?usp=drivesdk`

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

```
Pre-requisites: Python 3.9+, pip, a virtual env tool, a Gemini
API key, and 4GB+ RAM (for local LaMini-Flan-T5 inference)

Step 1: Clone the repo
  git clone https://github.com/AP24110010223/EduGenie.git
Step 2: Create & activate a virtual environment
  python -m venv venv  &&  venv\Scripts\activate
Step 3: Install dependencies
  pip install -r requirements.txt
Step 4: Configure environment (copy .env.example to .env
  and add GEMINI_API_KEY)
Step 5: Start the application
  uvicorn app.main:app --reload
Step 6: Open a browser at http://127.0.0.1:8000
```

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	LaMini-Flan-T5 summarization runs slower on low-memory machines	Runs acceptably on Mac M1 8GB+; close other apps for best performance
2	No persistent storage for quiz/learning history	Sessions reset on restart; persistent storage planned for a future release
3	Gemini API rate limits under heavy concurrent use	Add request throttling and response caching (planned enhancement)
