Project Name	EduGenie – AI-Powered Educational Assistant
Maximum Marks	4 Marks
Team Lead	Pavan Varma Uddaraju
Members	Voruganti Krishna Sanket Naresh C Humaira Tasneem Syed Sai Subash Raja Kosaraju

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I just need a quick, simple explanation – not a 10-page textbook." • "I wish I could test myself on exactly what I just studied." • "I don't know where to start learning this topic from scratch."	Student / Self-Learner A college student or independent learner who studies across multiple subjects and needs fast, reliable, AI-powered academic support.	THINKS • Maybe AI can explain things better than my teacher or Google. • I wonder if there's a tool that can generate a quiz for my exact topic. • I need a structured roadmap; otherwise I'll get lost and give up.
DOES • Searches YouTube and Google repeatedly for concept explanations. • Takes notes manually from multiple unstructured sources. • Asks friends or forums for topic-specific quizzes or study plans.		FEELS • Overwhelmed by the volume of unstructured information available online. • Frustrated when explanations are too complex or too shallow. • Motivated and relieved when a tool actually helps them learn efficiently.
